DETAILED ACTION

Election/Restrictions

1. Claims 1-5, 13-21, and 6-12, directed to a cellulose ester film, are hereby rejoined and fully examined for patentability. Claims 22-25, not directed to the cellulose ester film, will not be rejoined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-21 contain “a modified cellulose in which an ultraviolet absorbent structure bonds directly or through a spacer to a hydroxy group of cellulose or its derivative” and “a halogen atom or a substituent”. The derivative and the substituent do not have proper support in the specification and are not well defined by the claims. The specification does not provide sufficient information to determine the breadth of the invention, which would require the undue burden of experimentation.

Art Unit: 1711

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-21 are indefinite due to the use of “a modified cellulose in which an ultraviolet absorbent structure bonds directly or through a spacer to a hydroxy group of cellulose or its derivative” and “a halogen atom or a substituent”. It is unclear to the examiner as to the metes and bounds of the “derivative” and “substituent” that applicants are trying to claim. The words “derivative” and “substituent” do not define any proper Markush group, nor are they an art-recognized term that members thereof are known or easily ascribed.
